I support solar power on Utah residential rooftops.

I oppose Rocky Mountain Power's proposed fee increase of \$4.25 per month targeting those customers.

Rocky Mountain Power is a huge source of air pollution. They're the largest source of air pollution in western utilities! The solution is more solar, which residents have invested in with their own money. Solar can reduce our coal dependency and improve our horrible air.

Solar customers are doing exactly what I wish Rocky Mountain Power would do: invest in Utah's renewable energy resources! I am very concerned that a solar penalty will stop some customers from "going solar."

I stand with the rooftop solar energy producers of Utah and ask that the \$4.25 solar penalty NOT be approved. Their personal investment in clean energy creates clear benefits to Utah's health, environment, and economy. They should not be penalized; rather, they should be commended.

Thank you,
